“Efforts on developing infrastructure as an asset class have increased in recent years. Enhancing public and private cooperation in infrastructure financing and addressing challenges as well as opportunities for public and private stakeholders in infrastructure investment is key.” *Thierry Déau, Chairman of LTIIA Board, Founder and Chief Executive Officer Meridiam*

“The G20 has recently reiterated the importance of achieving sustainable infrastructure to meet the Sustainable Development Goals by 2030. SOURCE will increasingly play a strategic role in supporting the collection and standardisation of data, the development of well-prepared projects and high-quality infrastructure. We have made a priority in developing SOURCE to gather the best possible conditions for making projects attractive for long-term investors.” *SIF Council President, Rana Ghorayeb, Sr VP Investment, Infrastructure, CDPQ*
